PROFILE

Full-stack web and mobile developer & UI/UX designer with a Bachelor's degree in Computer Science. Passionate about creating modern, high-performing, and visually appealing applications, I design custom digital solutions that combine functionality and user experience. Versatile and detail-oriented, I am seeking freelance collaborations to strengthen my experience, expand my skills, and help businesses bring their digital ideas to life

TECHNICAL SKILLS

💻 **Development :**
HTML, CSS, JavaScript, TypeScript, PHP, Python, Django, Django REST Framework, React Native, React, Tailwind CSS

🗂️ **Databases :**
MySQL, SQLite, PostgreSQL

🎨 **Design & Prototyping :**
Figma, Adobe XD, Canva, Photoshop

- **No Code :** WordPress , Odoo

PROJETS

- **CV Creation Platform (Django)**: A website that allows users to easily and quickly create professional resumes using various templates.

- **Local Cybercafé Management System (PHP & MySQL)**: Platform for managing connection time, pricing, and connected clients.

- **Pharmacy Management System (PHP, MySQL & ChartJS)**: Stock management of medicines (added and sold) with data visualization charts over time.

- **School Tracking Platform for Parents (Django, React Native)**: Digital correspondence book allowing parents to monitor their children's attendance, grades, homework, and payments, with a built-in messaging system between parents and teachers.
